Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. - (a) Title of the Invention.
- (b) Cross-References to Related Applications.
- © Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).

Art Unit: 3634

3. Claims 1-7 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

These claims are narrative in form and replete with indefinite, functional or operational language, and idiomatic errors. As such, these claims fail to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

4. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Whitehouse et al, Jones et al '887 and '140.
